SVA MANAGED SERVICE: BIG DATA

Data is the most valuable resource in today's economy. As a result, it must be securely stored and protected against unauthorized access. Many businesses therefore rightly choose the keep their data in house, as this is the only way to ensure the required level of security. But there is an alternative: we can help you operate your big data platform through software as a service from a highly secure data center in Germany.

Increasing globalization, dynamic infrastructures and artificial intelligence (AI) are fueling exponential growth in data that many companies are struggling to handle. This is because as well as constantly requiring more storage capacity, greater quantities of data also need modern storage and backup systems. Intelligent big data platforms are also called for that meet today's security standards.

Responding to these needs requires money and staff, especially for businesses which want to manage huge quantities of data in house.

BIG DATA AS A MANAGED SERVICE FROM SVA

Businesses looking to both reduce their costs and ensure the utmost level of security, reliability and flexibility in data management can benefit from SVA's managed service. This operates the big data platform from a German cloud.

We assume full operational responsibility for your big data systems and provide all the necessary resources in a flexible, scalable and cost-effective way.

PRIVATE OR PUBLIC CLOUD: THE CHOICE IS YOURS

You decide where your big data platform is operated. You can use Microsoft Azure as a public cloud, or SVA's very own private cloud environment. Both options feature data storage in Germany, ensuring maximum security at all times.

HOW YOU BENEFIT

> You can concentrate on your core business while our experienced specialists look after your cloud services 24 hours a day, 365 days a year.
> Our monitoring system proactively detects errors and immediately initiates the right troubleshooting process.
> Guaranteed data storage in Germany. We can operate your services securely in Microsoft Azure or our very own SVA private cloud.
> We regularly check our services for weak points and react quickly to security warnings, resolving them and reporting proactively.
> We can connect your site via VPN or can integrate into your existing MPLS, for example. This gives you secure and reliable access to all cloud services.
> You can deploy your IT specialists where you need them and always keep your services up to date.
> Optimized processes and a fixed contact partner mean you stay in control.

Would you like to know more about SVA's big data managed service?
We look forward to hearing from you.

Employing more than 1800 staff at 24 sites, SVA is one of the leading system integrators in Germany.
