for z/OS Software

Managed Service for z/OS Software Maintenance

↳ THE FOUNDATION OF SYSTEM STABILITY

The significant effort required to maintain z/OS software, combined with the growing shortage of skilled mainframe professionals, presents many organizations with a major challenge: Critical maintenance activities are becoming increasingly difficult to perform as part of day-to-day operations due to limited staffing resources. However, it's essential to keep the z/OS software landscape stable, secure, and up-to-date. That's where z/Maint comes in.

z/Maint is a managed service for automated z/OS software maintenance. The service covers the complete system maintenance of your IBM and ISV software. With every z/Maint delivery, you receive a fully maintained and quality-assured software environment, tailored to your specific requirements. This keeps your target systems up to date automatically – for efficient and reliable operations, without adding anything to your team's workload.

YOUR BENEFITS WITH z/MAINT:

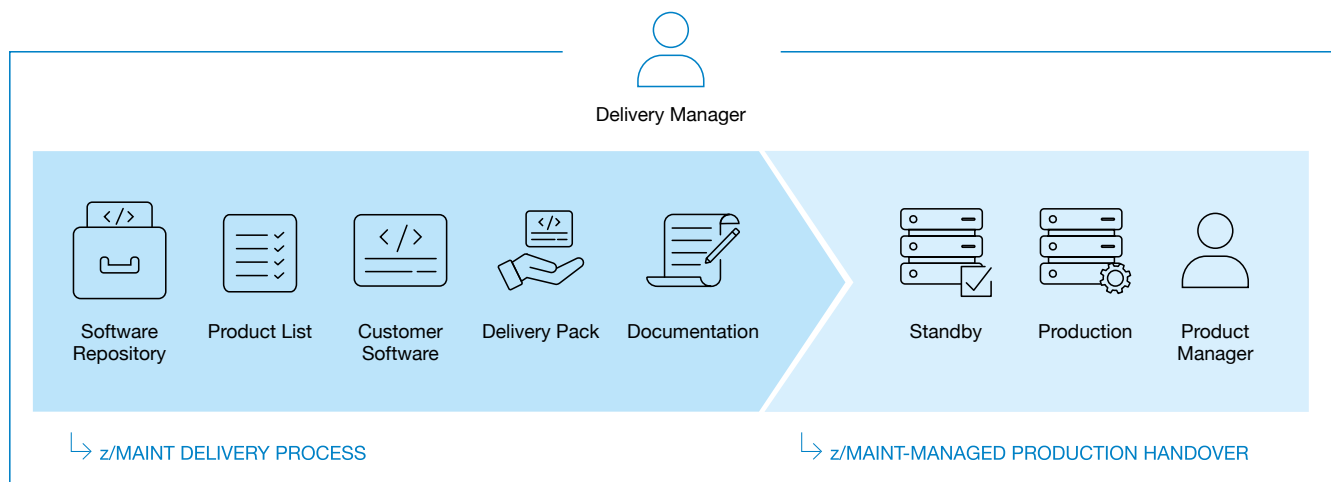

- **Up-to-date Maintenance Environment:** Your target systems remain up to date at all times.
- **High Resilience:** Keep your z/OS infrastructure stable, secure, and resilient over time.
- **Expert Knowledge:** Our mainframe specialists ensure the highest level of technical quality.
- **More Time for Your IT Team:** Time-consuming routine maintenance tasks are eliminated.
- **Audit-Compliant Documentation:** All system changes and maintenance deliveries are documented.

THE z/MAINT PROCESS – AUTOMATION DONE RIGHT

With z/Maint, z/OS software maintenance is managed through a tenant- and staging-based process, using an ISPF/PDF dialog system. z/Maint provides an automated maintenance process covering every step: From planning, installation, and integration of your system modifications all the way to delivery, software migration, testing, and final production handover. The entire process is coordinated by our Delivery Manager, who aligns all the requirements and parameters with your team. This way, z/Maint handles every required step of the z/OS software maintenance process.

z/OS software maintenance is carried out within your existing system and operational processes. Both SMP/E and non-SMP/E software are seamlessly integrated, while your established security and naming conventions are maintained. This ensures that every maintenance delivery is technically complete, consistent, and implemented precisely according to your requirements.

With over 25 experienced system programmers and many years of consistent 100% SLA fulfillment, z/Maint sets the standard for reliable z/OS software maintenance. Based on your system landscape and maintenance requirements, we can develop a solution tailored to your specific needs.

Get started with z/Maint today – and let automation handle z/OS software maintenance while your team focuses on what drives the business forward.

ABOUT US

SVA System Vertrieb Alexander GmbH is one of the leading German system integrators and combines high quality IT products of different vendors with the project know-how and flexibility of SVA to achieve optimum solutions. SVA core subjects are not only Data Center, Business Continuity, Digital Process Solutions and SAP but also solutions for modern demands such as Cloud, Cyber Security, Big Data & AI, Modern Workplace and Agile IT & Software Development.
