z/Hosting
The Alternative to
Your Own IBM Z
Infrastructure

Managed Service for IBM Z Development Environments

↳ **WORLDWIDE AVAILABLE & 100 % IBM-CERTIFIED**

z/Hosting is the world's only shared IBM Z development environment operated by an IBM Business Partner – 100% IBM-certified. With z/Hosting, you benefit from a fully managed development platform delivered as a managed service and tailored to your specific requirements. Gain access to full IBM Z capabilities without the need to invest in costly mainframe hardware or manage its ongoing operation.

We take care of provisioning, system maintenance, release upgrades, and security to ensure smooth operations and minimal administrative effort. Whether you require a complete migration of your existing development environment or a customized new setup – our specialists are there every step of the way. We support you before, during, and after the implementation process. This allows your development teams to stay focused on what matters most, while z/Hosting reliably delivers and maintains the underlying environment.

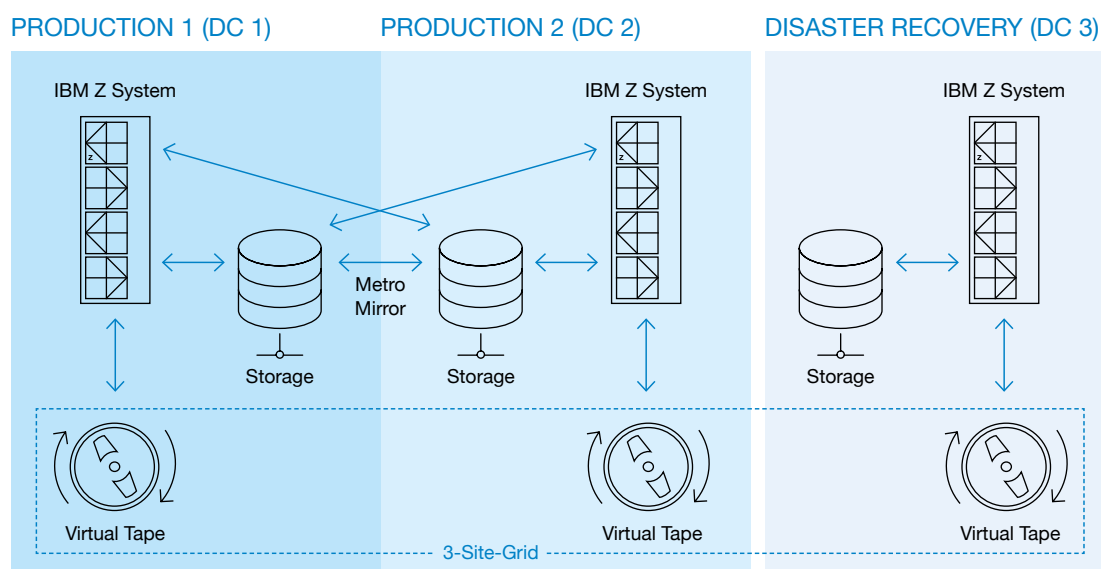

YOUR BENEFITS

- **100 % IBM-Certified Environment:** Customized development environments for z/OS, z/VM, Linux on IBM Z & VSEn (21CS)
- **Fully Managed Environment:** From system provisioning and release upgrades to ongoing maintenance
- **Fast Onboarding:** Your environment can be up and running within days
- **Comprehensive Services:** Consulting, implementation, migration, analysis, and operational support
- **Cost-Effective:** No investment or operation of your own mainframe hardware required

z/HOSTING DATA CENTER: DESIGNED FOR MAXIMUM SECURITY AND AVAILABILITY

z/Hosting is in a state-of-the-art data center at Equinix in Frankfurt, equipped with the latest operational and security technologies. Our customers have 24/7 access to modern IBM Z systems. All systems, from the mainframe and storage systems to the virtual tape library, are fully redundant.

In addition, z/Hosting includes a dedicated third data center at Akquinet in Hamburg for disaster recovery. This provides an extra layer of resilience in the event of a major site outage. Regular maintenance of all systems by the respective vendors further ensures the reliable availability of your development environment at all times.

For nearly two decades, z/Hosting by SVA has provided organizations with secure, scalable access to IBM Z systems for development and testing, hosted in our state-of-the-art data center. More than 50 international customers trust our infrastructure and expertise to run their z/OS, z/VM, Linux on IBM Z and VSEn (21CS) environments reliably, efficiently, and cost-effectively.

Get started with z/Hosting today: We take care of your environment – so you can focus on IBM Z development and deliver results faster.

ABOUT US

SVA System Vertrieb Alexander GmbH is one of the leading German system integrators and combines high quality IT products of different vendors with the project know-how and flexibility of SVA to achieve optimum solutions. SVA core subjects are not only Data Center, Business Continuity, Digital Process Solutions and SAP but also solutions for modern demands such as Cloud, Cyber Security, Big Data & AI, Modern Workplace and Agile IT & Software Development.
